## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Holmes et al. P.N. 5,491,415 (Holmes).

Holmes discloses a radio frequency coil for use in a MRI apparatus. As is well known the MRI apparatus conventionally uses a static magnetic field generator and gradient field coils. Holmes RF coil is shown in Fig. 2 and described in col. 4-5. Holmes RF coil features a coil made of several segments 52a, 52b etc. that are disposed on a substrate. Electrically connected to the RF coil is an electronics module 54 as described in lines 25-41 of col. 4. Note that the electronics module 54 is disposed on a central region of the substrate. The substrate may be a polyamide film which is flexible as described in line 3 of col. 4.

Holmes meets all the limitations of the claims at issue.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 2831

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Warntjes and Gianquinto et al. disclose RF coils for use in MRI. Note the abstracts of each of these disclosures.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Louis M. Arana whose telephone number is (571) 272-2236. The examiner can normally be reached on M-Thurs. Fridays Off.
